LOCATION: Dubai, UAE | Visit Visa | AVAILABILITY: Immediate Joiner

PROFESSIONAL SUMMARY:

Software Development Engineer with hands-on experience in backend engineering, cloud-based application development, enterprise ERP systems, RESTful API development, analytics, and AI-powered applications. Strong in Java, Spring Boot, Python, SQL, MySQL, Lang Chain, Retrieval-Augmented Generation (RAG), Large Language Models (LLMs), and Agentic AI. Experienced in translating business requirements and logic into maintainable technical solutions, building analytics capabilities, testing/debugging applications, and producing technical documentation. Proven ability to deliver milestones efficiently, earn manager trust, and take on progressively complex responsibilities.

PROFESSIONAL EXPERIENCE:

Vitwo Technologies | Kolkata, India

Software Development Engineer | Sep 2025 – Aug 2026

Previously Backend Development | Environment: Java, Spring Boot, REST APIs, MySQL, SQL, Git, GitHub, Postman, ERP, BI

- Contributed to development, enhancement, and maintenance of 50+ RESTful APIs using Java and Spring Boot, supporting data exchange and business processes across enterprise ERP modules.
- Played a key development role in a large-scale ERP platform, working across backend services, business logic, database integration, APIs, and enterprise workflows.
- Contributed to ERP analytics and Business Intelligence capabilities, supporting KPI dashboards covering financial, sales, ageing, spend, and exception analytics.
- Worked with SQL/MySQL data stores and enterprise data sources to support reporting, analytics, API functionality, and application workflows.
- Helped streamline data integration workflows by centralizing enterprise data sources and reducing manual data processing.
- Translated business requirements and application logic into maintainable backend functionality and technical solutions.
- Performed API validation, automated testing, debugging, defect analysis, and issue resolution across ERP modules to improve release stability.
- Used Git/GitHub for source control and Postman for API testing, request/response analysis, and backend troubleshooting throughout the development lifecycle.
- Prepared technical documentation by understanding business requirements, application workflows, system logic, API behaviour, and implementation details.
- Consistently delivered assigned milestones efficiently, earned manager confidence, and progressed to higher-level technical responsibilities.

AI / GENERATIVE AI:

- RAG Applications: Developed RAG-oriented AI applications using Python, Lang Chain, LLMs, retrieval workflows, context aware generation, and prompt engineering.

- Agentic AI: Experience developing LLM-powered agent workflows involving tool/API integration, task-oriented execution, context management, and multi-step AI application flows.

PROJECTS:

Hand Gesture Recognition in Low Light

TensorFlow, OpenCV, Media Pipe

- Designed and trained a CNN-based computer vision model achieving 95% classification accuracy under challenging lowlight conditions.
- Implemented image preprocessing and enhancement pipelines using OpenCV and Media Pipe to handle adverse lighting environments in real-time inference.
- Published in the International Journal of Scientific Research in Science and Technology (IJSRST), 2025.

Virtual Mouse

Python, OpenCV, Media Pipe, PyAutoGUI

- Developed a webcam-based hand-tracking virtual mouse for real-time cursor control and mouse actions without physical input devices.

TECHNICAL SKILLS:

Languages: Java, Python, SQL
Backend: Spring Boot, Spring MVC, REST APIs, Hibernate/JPA, JWT, Maven, API Integration, Business Logic
Frontend: Basic of HTML, CSS
AI / GenAI: Lang Chain, RAG, LLMs, Prompt Engineering, Generative AI, Agentic AI, Prompt Engineering
Databases: MySQL, SQL, Database Integration, Relational Database Concepts
ERP / Analytics: ERP Analytics, KPI Dashboards, BI, Enterprise Reporting, Data Integration
Tools: Git, GitHub, Postman, IntelliJ IDEA, VS Code, PyCharm
Engineering: OOP, Data Structures & Algorithms, MVC, Automated Testing, Debugging, Technical Documentation
ML / Data: TensorFlow, OpenCV, Media Pipe, CNNs, Machine Learning, Computer Vision, Apache Spark, Databricks.

EDUCATION:

Bachelor of Technology (B.Tech.) – Computer Science & Engineering | 2021 - 2025

Maulana Abul Kalam Azad University of Technology (MAKAUT), West Bengal | Dr. Sudhir Chandra Sur Institute of Technology & Sports Complex, Kolkata, India CGPA: 8.14/10

PUBLICATION:

- "Hand Gesture Recognition in Low Light Conditions" — International Journal of Scientific Research in Science and Technology (IJSRST), 2025.

CERTIFICATIONS:

- AI & ML Using Python — [ARDENT COMPUTECH PVT.LTD.], [17-04-2023]
- Python Programming — [ARDENT COMPUTECH PVT.LTD.], [04-03-2023]
- HTML & CSS — [Euphoria genX], [17-08-2022]
- Python Programming for Everybody (Getting Started with Python) — [University of Michigan], [03-06-2022]
